We solve complex engineering problems

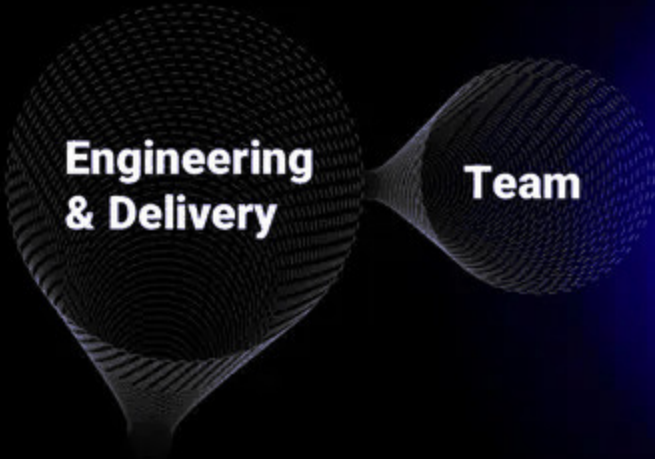

Passion for solving complex engineering problems is embedded in the company's DNA. Expertise, next-generation technologies and 10+ years of experience gained working on challenging projects have helped us build the engineering power needed to create ground-breaking solutions.

From **building medical devices, adding algorithms to microchips, optimizing routes for all the ships in the Pacific, through building robots, recording fetal ECG, crunching petabytes of data on a daily level to making ML libraries for the latest chips in mobile phones and building huge robotic machines that build those chips**, we spark innovation across industries and domains.

Cross-functional Team

**Engineering
& Delivery**

Team

TEO

Tech Excellence Office is a team of our most senior engineers and system/solution architects that define our technology standards across projects, support the growth of future tech leaders and work with our clients on defining their technology needs.

PIO

Product Innovation Office is a horizontal layer that connects all product managers and product designers across the company, and allows us to support our clients in strategic product decision making.

PMO

Project Management Office brings together all project managers in HTEC, to work together on defining our PM standards and ways of working and ensuring the quality and efficiency of our delivery across the board.

We choose our battles

Our domain expertise and the experience we have gained working on some of the most innovative projects allow us to see beyond a mere technical solution. We focus on making tangible industry-leading impacts.

Over the years, we have partnered with global corporations, research institutions, disruptive startups, and technology-driven leaders from Europe and Asia to the East Coast, West Coast and Midwest to create digital products that transform businesses.

We deliver technology excellence while establishing strong bonds with our clients whom we treat as partners and peers, showing them a world of opportunities and ultimately positively influencing their business.

At HTEC, **creativity** meets **deep engineering**
enabling our partners to rapidly **innovate**
and create **disruptive** digital products
across industries.
