

**Low-code foundation for building and running
digital products, internal apps and more.**

Company and Investment Overview

\$10 million equity round

The Problem

Despite the enormous economic productivity gains from software, there has been little innovation in how we build it.

The frameworks are better, the languages a bit more clever, **but mostly we're doing the same things.**

—Sam Altman

The Solution

Low-Code and No-Code Tools have emerged to radically transform how software is built and maintained.

Professional Developers and
Other Collaborators

Citizen-Developers

Low-Code

Example:  8base

No-Code

Example:  bubble

Developments Tools

Enhance Development
Productivity

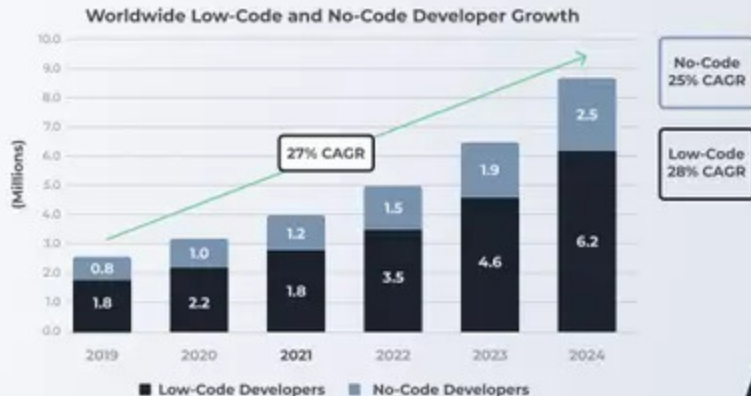

Hosting Environment

Eliminate need to manage
cloud infrastructure

*These platforms reduce
hand-coding, enabling
accelerated delivery of
business applications.*

Momentum is Building

Low-Code and No-code have arrived

Morgan Stanley Research: New Stack Monthly | February 2021

65%

"By 2024, 65% of app development will be done using low-code tools"

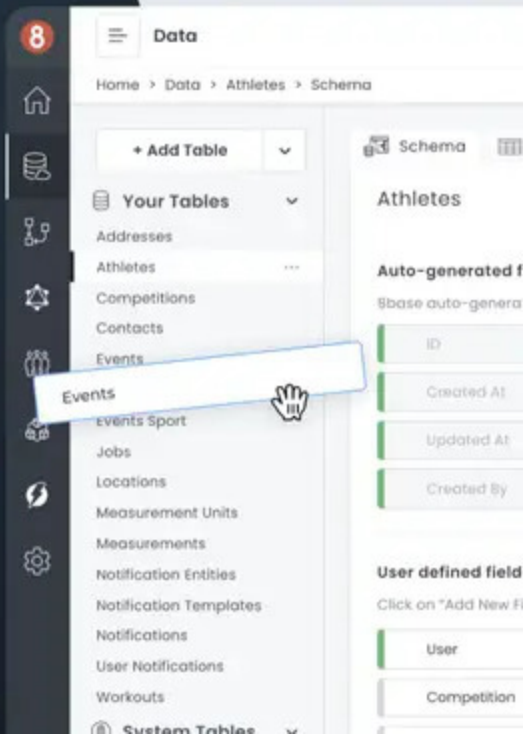

—Gartner

Our Product

Backend

Development Tools

- Visual data schema builder and database configuration tools.
- Spreadsheet-like data views.
- Serverless functions development.
- Role-based security configuration.
- Authentication and single-sign-on configuration.
- Email and text-messaging services configuration.
- Auto-generated GraphQL API and API Explorer.

Our Headless Backend is a Huge Differentiator

The easiest way to get up and running in the cloud

Architecture for agile organizations

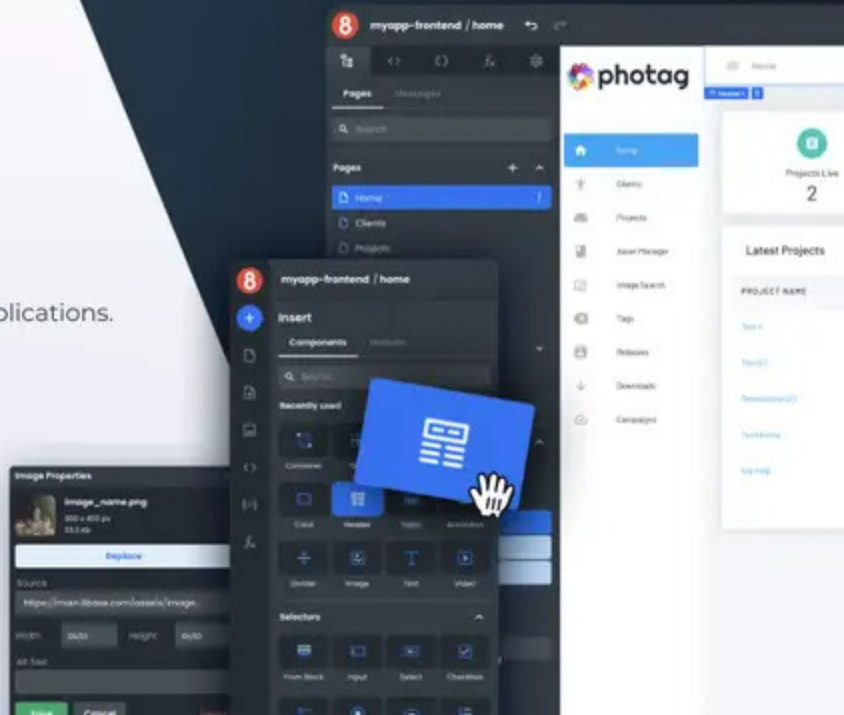

Powered by AWS

Google Cloud
(Coming Soon)

Our Product

Frontend Development Tools

- Build progressive web applications.
- Supports complex, multi-persona applications.
- Powerful drag-and-drop interface.
- Rich component library.
- Fully code-extensible components.
- Connects to any backend.

Bring Progressive Web applications to life at **ludicrous speed**

Multi-tenant SaaS
and Micro-SaaS

Marketplaces and
Network-Centric Apps

Portal and Customer
Experiences

Field Workforce
Applications

Customer Success

8base has helped bring multi-tenant SaaS, Marketplaces and portals to life
for startups and established organizations

Expanding Opportunity

App Builder expands 8base's addressable market to include **internal tools** development.

SOC II compliance will also bolster our move up market

Expanding integrations broadens our appeal and enables us to swim up market to mid-sized and large organizations

Trends that support our opportunity

Supply

Shortage of Developers

There is a shortage of at least 1.4 million developers in the US in 2021.

Bootcamp-Born Developers

Bootcamps producing junior programming talent.

Increasing Complexity

An explosion of technologies is driving need for expensive specialists.

Demand

Digital Transformation

Businesses challenged with infusing technology into their business models.

Startup Frenzy

New ventures popping up faster with non-technical founders at the helm.

Micro-SaaS

Founders launching bootstrapped tech ventures with limited ability to raise venture capital.

The Market

Projected Low-Code Development Growth
