

The Leader in Automated Always-On Brand Tracking

BlueOcean is a software company based in Silicon Valley applying machine learning and AI to disrupt the \$74 billion market research industry. It's just the beginning.

**35
FTE**

**10.8% MoM
growth**

**Informing more than \$18
Trillion in brand value**

T2D3 Track

**Investors include executives
and founders of Qualtrics,
Looker and Avalara**

Marketing is broken.

1 Tools of the past not built for the digital age.

2 Covid created the need for every brand to have a direct relationship with their customers, making brand an imperative.

3 Google's Cookie Apocalypse and other privacy landmines such as Apple's new privacy settings are rendering marketers basically blind and feeling their way in the dark.

A trillion dollars of annual marketing (important + necessary) is no longer effective or measurable and needs a new type of guidance.

BlueOcean is 10% of the cost, 26x faster.

Old Way to Track Brand

Actionable

For all companies

In our customers own words - BlueOcean tells Brands “What’s Next” right now.

“Traditional brand health auditing is like going to the doctor once a year. BlueOcean is like having an Apple Watch on your wrist giving you live updates that tell you how to improve your health right now. And maybe even how to save your life when you didn't even know there was a lurking problem.”

Head of Brand Analytics, Global Spirits Company

Built by people that understand the problem - 35 FTE and growing

Our Progress To Date

Brand Tracking is viral

2nd with intercompany networks via agencies or consultants. ABC's consultant shared us with DEF.co. They both need it even more now that they know they both use BlueOcean.

And even employee attrition helps us grow as we stay, but they leave and take us with them
note: 17% attrition in marketing, highest of any job function

Users Training the Data

For What

Raise money to drive more sales on a highly successful product.
Launch our next product, API access; building unbreakable lock-in

Why Now

Get this done before anybody even sees us coming.

And then...

Move into adjacent markets systematically opening up billions of dollars
of market opportunity.
