

COWBOY.

Series C

COWBOY.

Introduction

Introduction

We believe in a world with freedom in urban mobility

Our mission is to power riders to map their own paths

Pitch

60% of car trips are below 5 miles

Slow

The average speed of traffic in large European cities is now < 10mph. That's the same speed as the horses and carts of a century ago.

Stressful

The average American commuter spends 42 hours per year stuck in rush-hour traffic. To save a minute of time spent in traffic, people would be willing to trade five minutes of any other leisure activity.

Unsustainable

In 2050 2.5 billion personal vehicles will need to emit as much as 50 million did in 1950 – a reduction in emissions per vehicle, including manufacturing, of 98%.

Perfect timing

Technology

Light and durable Li-ion batteries are becoming cheaper and more accessible, notably thanks to the advances of electric cars.

Infrastructure

Cities like Paris, Amsterdam, Brussels and New York are investing massively in cycling infrastructures.

Sustainability

22% of global greenhouse gas emissions are attributed to the transportation sector.

"The vehicle of the future has two wheels, and is a bike."

WIRED

2x Faster

e-bikes move people 2x faster than cars in large cities.

Healthier

e-bikes provide a psychological boost and a meaningful workout.

10x Cleaner

e-bikes have a carbon footprint per mile 10x smaller than a car.

Cowboy at a glance

Software

Secure your bike

The app is your bike's key; you're the only person who can unlock it. Whether near or far, you're able to locate your bike at all times with GPS tracking

70%

bikes recovered after a theft with Find My Bike

Software

Along for the ride

From mapping the best routes to keeping you informed of the essentials powering your ride, the app is your key to a smarter, more mindful ride

Software

Stay safe

Ride worry-free with our embedded security features like crash detection, brake lights or shared position so you can focus on the thrill of the ride

Software

Keep moving

With embedded bike sensors, you can track all your activities in detail. Keep your mind and body in balance as you ride to score your moving goals

25+

data points collected
every second

Join in

See how your stats stack up with your fellow riders. Track your fitness and find out how far you've ridden compared to the community

Software

"The most well developed e-bike app we've tested to date."

COWBOY.

**The
Guardian**

"Right on target: Cowboy's electric bike is a dead cert to be a big hit with commuters across Europe."

Martin Love, The Guardian

TNW

"It rides like a dream. Like a goddamn beautiful dream. Ugh, I like it so much."

Callum Booth, The Next Web

techradar.

"With hipster stylings and live diagnostics, has Belgian firm Cowboy made e-bikes cool?"

Catherine Ellis, TechRadar

engadget

"I was floored by the bike's rapid acceleration whenever I entered a roundabout or pulled away from a previously red light."

Nick Summer, Engadget

THE VERGE

"Cowboy is a name to watch in the booming e-bike industry."

Thomas Ricker, The Verge
